aging	stainless steel tank
must weight	19.5° KMW
alcoholic content	13 %
acidity g/l	5.9
residual sugar g/l	1.6
drinking temperature	12°C

What does schist do to Grüner Veltliner grapes? Well, once ripe they are furnished with an incredible amount of mineral tones and firm spiciness. Grown on a soil that is normally exclusively reserved to great Rieslings, this wine is for me one of the most interesting ones to make.
