aging	stainless steel tank
must weight	19° KMW
alcoholic content %	12.5
acidity g/l	6.8
residual sugar g/l	1.1
drinking temperature	12°C

Our youngest vineyard with its old Grüner Veltliner vines. The name "Hölle" is derived from the southerly basin, where the sun shines the whole day and high temperatures can be reached.

It's a calm place with deep loess soil. The wine was vinified by our young oenologists Hans-Peter and Maximilian.
