aging	in a new barrel on fine yeast until the end of May
must weight	20° KMW
alcoholic content %	13
acidity g/l	5.1
residual sugar in g/l	4.3
drinking temperature	13°C

AT-BIO-402
EU-Landwirtschaft

Around a third of the grapes are harvested for our Brut Reserve as early as the beginning of September. The remaining Weißburgunder can further mature thanks to a thinned-out wall of foliage, before going to the press house for gentle pressing. Almost half of the quantity is aged in Manhartsberger oak barrels for more than 12 months; the other half remains in the steel tank until blending.
